

## TWILIGHT STAR

### Specifications:

LOA.....8.5m  
 LWL.....7.5m  
 BREADTH.....2.6m  
 DRAUGHT.....0.95m/1.65m.  
 DISPLT.....2.56tonnes.  
 BALLAST.....0.90tonnes.

Designed as a compact and robust trailerable yacht, this is a cruising boat best suited to two crew. The layout sleeps four at anchor, with the intention to use only the quarter berths at sea. Raised topsides in the manner of Maurice Griffith's English designs give the saloon and galley area more space and allow the head to have good headroom.

Specifications for the hull strip planking are for 15mm cedar and 600gsm DB exterior / 400gsm interior reinforcements. The cabin and decks are plywood and fabric on the exterior, with plywood also for the internal fitout, which is bonded to the hull and deck. The moderate cutter rig is easy to handle and combined with the centre board will give good windward performance.

This is a pretty hull which features modest tumblehome in the topsides to enhance its appearance. She will make an excellent coastal cruiser, which is capable of sailing a reasonable passage if needed, but is also able to be trailed or trucked interstate if preferred.

Includes lines, bodyplan, offsets to inside of planking for mould stations and bulkheads, arrangement, deckplan, sail and rig plan, and structural drawings including details for rudder, keel and centreboard.
