LWL	7.00M
BEAM	2.43M
DRAUGHT	1.85M/ 0.45M
DISPLT	1350kgs
BALLAST	400kgs
SAIL AREA	36.59M <sup>2</sup>

With racing attributes on the exterior and a generous layout for cruising/entertaining below decks, this cedar strip plank boat has an excellent combination of features for maximum enjoyment. It is long enough to be in contention for line honours on race days, with a powerful rig proportioned for good all round performance. The boat is relatively straight forward to build, using 410gsm DB laminates on 12mm cedar strip planking, with a combination of cedar and ply panels for the deck, cockpit and cabin. It would be possible to further develop the structure for an advanced racing boat using a lighter and simpler fitout.

For the home builder, this boat appeals as an attractive medium term project, with the finished item a fast, contemporary styled yacht.

Plans include lines, offsets, arrangement, rig, structural drawings, keel and rudder
