Epox-E-Glue

by *BoatCraft Pacific* **The truly versatile repair kit.**

Suppose some clumsy oaf backs into your brick fence and knocks it over. You could call for the bricklayer at great expense or buy a 1kg pack of EPOX-E-Glue, make up a couple of wooden wedges and fix it yourself.

Or, you are having coffee one morning and the handle falls off the coffee unit. Some epoxy glue, some matches to measure & mix it and a piece of cardboard to mix it on and five minutes later, it is permanently repaired.

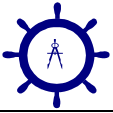

The only limit is your imagination!!!

Epox-E-Glue comes in 200gram, 600 gram, 1kg, 1.6kg, 4kg and 8kg packs. It is available in White, Pine (Honey) and Cedar (Reddish Brown colours). It can be coloured as required with spirit based stains such as Feast Watson Proof Tint.

Epox-E-Glue[®]

by *BoatCraft Pacific* **The truly versatile repair kit.**

A do it yourself chemical anchor system.

Drill the holes in the masonry

Equal parts by volume, by eye.

Mix the two parts.

Apply glue to the screw threads

Put glue in the drilled holes

Push the screws into the holes and leave to set.

Get around finding someone to weld Stainless Steel with the chance of damaging the highly polished surface by Gluing up with EPOX-E-Glue

Stainless Steel Glass Brackets & Stainless Steel Post that Epox-E-Glue applied & Slid were a sloppy good Fit
