

6.40M TRAILER/SAILER

LOA	6.40M
LWL	5.42M
BEAM	2.43M
DRAUGHT	1.54M/
	0.355M
DISPLT	900kgs
BALLAST	350kgs
SAIL AREA	23.6M ²

This is a stretched version of the 5.5M boat, using almost identical construction. The increase in length has allowed a very promising little cruiser to develop, ideal for a small family. The Handsome raised deck profile was designed as an option to give maximum interior space for a boat that may be cruised for an extended period.

Rig proportions and ballast are designed to give good stability, and like the 5.5M boat, it can be built to the standards required for racing. 9mm W.R.

Cedar strip planking with a 410DB exterior laminate and 300 gsm cloth interior laminate is used for hull, plywood for the decks.

Like its smaller sister this boat is at home exploring enclosed waters, yet it can be set up to race when one feels like a bit of competition.

Includes lines/body plan, layout/deck plan, rig plan, construction plan, rudder, centreboard, and two drawings with full size templates for hull and deck frames etc.
