LuciClear Deep Casting Resin Projects

Burl with many open cracks filled with LuciClear before machining into a bowl.

This Burl would have fallen apart if carved before filling with Epoxy.

The process from start to finish is on our Youtube Channel @ [How to: Casting Resin Burl](#)

As poured finish.

Basic Camphor Laurel Slab split in half and River Poured. The process from start to finish is on our Youtube Channel – The Epoxy Guru @ [HOW TO: DIY RIVER TABLE](#) .

It was then coated with Pour On Gloss.

This is BoatCraft Pacific's original Display piece which shows off the clarity of the LuciClear Resin.

An overview of LuciClear is on our Youtube Channel @ [How To: Crystal Clear River Pour](#)

As poured finish.

The alter, lectern & chair have been made using LuciClear in the fill areas with The Bote Cote Epoxy Pigment Liquid. The cracks and defects were filled using LuciClear.

As can be seen they are used in a church with an oiled finish.

An Electric Guitar made from a Coolibah Slab.

Made by a Luthier who bought the slab at Sydney Timber, Tools & Artisans Show and asked us for a solution to make it into a Guitar body. Martin did a magnificent job and was blown away by the clarity of the finish.

Finish is buffed and polished.

An office table with computer Workstation made using LuciClear with Epoxy Pigments. Photo provided by BoatCraft Pacific.

When using the LuciClear for River Pours it is a great way to turn very ordinary slabs or pieces of timber into masterpieces.

A steel framed table with Black Butt Burl encased in LuciClear Resin with a river sand base.

Then overcoated with AquaCote clear applied using a foam brush. This provides excellent UV resistance to allow this table to be located outside.

A high gloss finish could be achieved by buffing and polishing similar to restoring car ducco. The customer considers there is sufficient gloss for outside as finished.

We have a full range of Epoxy Pigments available;

- The six base colour pigment pastes in 100gram containers. Black-White-Yellow-Red-Green-Blue. These go a long way – be frugal when adding.
- Forty five (45) colours of The Epoxy Guru Pearlite Pigment Powders in 10 gram bags.
- Six (6) Fluorescent Colours and three Chamellon colours.
