

5.5M TRAILER SAILER

LOA	5.480M
LWL	4.640M
BEAM	2.420M
DRAUGHT	0.355M/ 1.440M
DISPLT	700 KGS
BALLAST	250 KGS
SAIL AREA	20.2M ²

This boat is designed as a compact daysailer or weekender to suit two to four people, ideal for a small family who enjoy camping excursions. Her moderate rig and fixed ballast give her good stability and good sailing characteristics. The open area between the berths in the cabin gives space for a porta potti and a small galley/bench and locker opposite. The arrangement, watertight compartments and other features, allow her to comply with the requirements of the Trailerable Yacht Association for racing.

She is designed for construction in strip plank, using 9mm balsa/veneer or Western Red Cedar, with a 300gsm reinforcement inside and out. Decks and bulkheads are plywood.

Includes lines/bodyplan, layout/deck plan, rig plan, construction plan, rudder, centreboard, and two drgs with full size templates to mould frames for hull and deck, and templates for keel.
